Scotty Henry

I like to build stuff

Cincinnati, OH   www.linkedin.com/in/scottyhenry/

SUMMARY

I'm a software developer based out of Cincinnati, Ohio with a tendency to go deep on whatever I'm working on.

Over the last 6+ years I've worked across mobile and web — native iOS, React Native, and increasingly the full stack. I'm drawn to problems that require learning something new or rethinking a familiar pattern entirely.

When I'm not writing code I'm watching anime, playing FPS games, or spending time with my family and my dog Goobs. A clear head makes for better work.

EXPERIENCE

TalentNow   *Current*
Full-Stack Developer — VMS & Talent Marketplace

Built and maintained a multi-tenant Vendor Management System and Talent Marketplace platform serving staffing workflows end-to-end. Developed React/TypeScript SPAs with Apollo Client and GraphQL, built GraphQL gateways aggregating 11+ microservices, developed Python Flask microservices with Celery for async processing, and operated in a Kubernetes environment with Azure Pipelines CI/CD.

React · TypeScript · GraphQL · Apollo · Python · Flask · Kubernetes · PostgreSQL · Redis · Elasticsearch · Auth0

CarelonRx   *2023–2024*
Mobile Developer — Welcome Experience

Contributed to a new and engaging welcome experience for the CarelonRx brand written in React Native. Leveraged innovative designs while overcoming many challenges to deliver an engaging, well thought out user experience focused on educating and responding to new and existing users intuitively.

React Native · TypeScript · Mobile

PayTile   *2022–2023*
iOS Developer — Proximity Payments Platform

Contributed to a native iOS application focused on proximity-based, private and secure mobile transactions. Required building unconventional solutions to complex problems including user location services, PCI compliance, and offline payment flows.

Swift · iOS · UIKit · CoreLocation

JTV   *2020–2021*
Web Developer — WebOS Live Commerce Application

Contributed to a WebOS application written in React for a large multimedia jewelry company enabling live-streaming and real-time product engagement, complementing an existing e-commerce experience while maintaining exceptional branding and user experience.

React WebOS JavaScript

OptUp
2019–2020

iOS Developer — Health & Nutrition Application

Contributed to an iOS native mobile application which aggregated grocery spending data to generate a nutritional health score and, based on that score, provide targeted benefits within a healthcare application.
